This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is located.
- Consult your dealer or an experienced radio/TV technician.

FCC warning:

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**ATTENTION**

The use of a shielded interface cable is required to comply with the Class B limits of Part 15 of FCC rules. The length of the AC cable must be 2 meters (6.6 feet) or less.

This digital apparatus does not exceed the Class B limit for radio noise emissions from digital apparatus set out in the Radio interference Regulations of the Canadian Department of Communications.

This Class B digital apparatus complies with Canadian ICES-003.

Le présent appareil numérique n'émet pas de bruits radioélectriques dépassant les limites applicables aux appareils numériques de la classe B prescrites dans le Règlement sur le brouillage radioélectrique dicté par le ministère des Communications du Canada.

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

Bescheinigung des Herstellers / Importeurs

Hiermit wird bescheinigt, daß der/die/das fi-5110C

- In Übereinstimmung mit den Bestimmungen der EN45014 (CE) funkentstört ist.
- Laut Maschinenlärminformationsverordnung 3. GS GV, 18.01.1991: Der höchste Schalldruckpegel beträgt 70 dB (A) oder weniger gemäß ISO/7779.

International ENERGY STAR® Program

As an ENERGY STAR® Partner, PFU LIMITED has determined that this product meets the ENERGY STAR® guidelines for energy efficiency.

The International ENERGY STAR® Office Equipment Program is an international program that promotes energy saving through the penetration of energy efficient computers and other office equipment. The program backs the development and dissemination of products with functions that effectively reduce energy consumption. It is an open system in which business proprietors can participate voluntarily. The targeted products are office equipment such as computers, monitors, printers, facsimiles, copiers, scanners, and multifunction devices. Their standards and logos () are uniform among participating nations.

This product has been designed and manufactured on the assumption that it will be used in office, personal, domestic, regular industrial, and general-purpose applications. It has not been designed and manufactured for use in applications (simply called "high-safety applications" from here on) that directly involve danger to life and health when a high degree of safety is required, for example, in the control of nuclear reactions at nuclear power facilities, automatic flight control of aircraft, air traffic control, operation control in mass-transport systems, medical equipment for sustaining life, and missile firing control in weapons systems, and when provisionally the safety in question is not ensured. The user should use this product with adopting measures for ensuring safety in such high-safety applications. PFU LIMITED assumes no liability whatsoever for damages arising from use of this product by the user in high-safety applications, and for any claims or compensation for damages by the user or a third party.

■ About the Use of Mercury

Lamp(s) inside this product contain mercury and must be recycled or disposed of according to local, state, or federal laws.

To avoid unexpected injury, read the following carefully.

Doing the following actions may result in serious personal injuries:

- Do not put the substance contained in the lamp in your mouth as it has mercury.
- Do not incinerate, crush, or shred the lamps or scanner parts.
- Do not breathe the chemical liquid contained in the scanner lamps.

Trademarks

Microsoft, Windows, and Windows NT are registered trademarks of Microsoft Corporation in the United States and/or other countries.

ISIS, QuickScan and their respective logos are trademarks or registered trademarks of Pixel Translations, a division of Captiva Software Corporation in the United States.

Adobe, the Adobe logo, and Acrobat are either registered trademarks of Adobe Systems Incorporated in the United States and/or other countries.

Other product names are the trademarks or registered trademarks of the respective companies.

How Trademarks Are Indicated In This Manual

References to operating systems (OS) and applications are indicated as follows

Windows 95	Microsoft® Windows® 95 operating system
Windows 98	Microsoft® Windows® 98 operating system
Windows Me	Microsoft® Windows® Millennium Edition operating system
Windows NT 4.0	Microsoft® WindowsNT® Server operating system Version4.0 Microsoft® WindowsNT® Workstation operating system Version4.0
Windows 2000	Microsoft® Windows® 2000 Professional operating system
Windows XP	Microsoft® Windows® XP Professional operating system Microsoft® Windows® XP Home Edition operating system

Where there is no distinction between the different versions of the above operating system, the general term "Windows" is used.

Adobe Acrobat 6.0 | Adobe® Acrobat® 6.0 standard

Safety Precautions

This manual describes important details for ensuring the safe and correct use of this product. Thoroughly read this manual before you start to use this product. In particular, be sure to read and fully understand the Safety Precautions described in this manual before you use this product.

Also, store this manual in a safe place so that it can be easily referred to during use of this product.

Warning Indications Used In This Manual

This manual uses the following indications to ensure safe and correct use of this product, and to prevent possible danger and injury to the operator and other persons.

Warning

This indication alerts operators to an operation that, if not strictly observed, may result in severe injury or death.

Caution

This indication alerts operators to an operation that, if not strictly observed, may result in safety hazards to personnel or damage to equipment.

Symbols Used In This Manual

This manual uses the following symbols in the explanations in addition to the warning indications.

	This symbol alerts operators to particularly important information. Be sure to read this information.
	This symbol alerts operators to helpful advice regarding operation.
	A TRIANGLE symbol indicates that special care and attention is required. The drawing inside the triangle shows the specific caution.
	A CIRCLE with a diagonal line inside shows action which users may not perform. The drawing inside or under the circle shows the specific action that is not allowed.
	Outline characters on a colored background show instructions users should follow. It may also include the drawing that shows the specific instruction.
	Clicking in this icon will play a movie.

Screen Examples In This Manual

The screen examples in this manual are subject to change without notice in the interest of product improvement. If the actual displayed screen differs from the screen examples in this manual, operate by following the actual displayed screen while referring to the User's Manual of the scanner application you are using. The screenshots in this manual were captured from the FUJITSU TWAIN32 scanner driver, ScandAll 21 Image Capturing Utility Software, FUJITSU ISIS scanner driver, QuickScan™ image capturing software and Adobe® Acrobat®.

Warning Label

The following picture shows the warning label used in this scanner.

**High Temperature**

The glass surface inside the ADF becomes hot during the operation. Be careful not to touch the glass surface inside the ADF.

**ATTENTION**

Do not remove from the scanner, stain or scratch the warning labels.

About Maintenance

The user must not perform repairs on this scanner.

Contact the store where you purchased the scanner or an authorized FUJITSU Image Scanner service provider to have repairs done on this product.

Safety Precautions

WARNING

The following are the important warnings described in this manual.

Do not damage the AC cable.

A damaged AC cable may cause fire or electric shock. Do not place heavy objects on AC cables, or pull, bend, twist, heat, damage or modify AC cables.

Do not use damaged AC cables or power plugs, or install any cables or power plugs to loose wall sockets.

Use only specified AC cables and connector cables.

Use only specified AC cables and connector cables. Failure to use the correct cables might cause electric shock and/or equipment failure.

Use this scanner only at the indicated power voltage.
Do not connect to multiple-power strips.

Use this scanner only at the indicated power voltage and current. Improper power voltage and current might cause fire or electric shock. Do not connect to multiple-power strips.

Do not touch the AC cable with wet hands.

Do not touch the power plug with wet hands. Doing so can cause electric shock.

Wipe any dust from the power plug.

Wipe off any dust from metal parts on the power plug or metal fittings with a soft, dry cloth. Accumulated dust can cause fire or electric shock.

Safety Precautions(2)

[◀ 1 | 2 | 3 | 4 ▶](#)**Do not install the scanner in locations subject to oil smoke, steam, humidity, and dust.**

Do not install the scanner in locations subject to oil smoke, steam, humidity, and dust. Doing so might cause a fire or electric shock.

**Turn the scanner OFF if it is damaged.**

If the scanner is damaged for any reason, turn the scanner off and unplug the power cable. Contact the store where you purchased the scanner.

**Do not put liquids inside the scanner.**

Do not insert or drop metal objects in to the scanner. Do not scan wet documents or documents with paper clips or staples. Do not splash or allow the scanner to get wet.

If foreign objects (water, small metal objects, liquids, etc.) get inside the scanner, immediately turn off the scanner and disconnect the power plug from the power outlet. Then, contact the store where you bought the scanner or the Maintenance Service Center. Pay particular attention to this warning in households where there are small children.

**Do not touch the inside of the scanner unless necessary.**

Do not take apart or modify the scanner. The inside of the scanner contains high-voltage components. Touching these components might cause electric shock or fire.

**Do not use the scanner if there is a strange odor.**

If you detect heat coming from the device or detect other problems such as smoke, strange smells or noises, immediately turn off the scanner and disconnect its power plug. Make sure that any smoke coming from it has stopped, before contacting the store where you bought the scanner or an authorized FUJITSU scanner service provider.

CAUTION

The following are the important cautions described in this manual.

**Do not install the scanner on unstable surfaces.**

Make sure that the scanner is installed on a flat, level surface and that none of its parts extend beyond the surface top, such as a desk or table. Do not install the scanner on unstable surfaces. Install the scanner on a level surface that is free of vibration to prevent it from falling.
Install the scanner on a strong surface that will support the weight of the scanner and other devices.

**Do not block the ventilation ports.**

Do not block the ventilation ports. Blocking the ventilation ports generates heat inside of scanner, which may result in fire or scanner failure.

**Do not place heavy objects or stand on top of the scanner.**

Do not place heavy objects on the scanner or use the scanner's surface top to perform other work. Improper installation might cause injuries and equipment failure.

**Firmly insert the power plug.**

Firmly insert the power plug as far it can go into the power outlet.

**Avoid any contact when scanner is in use.**

Avoid touching any scanner mechanism during scanning since this may cause injuries.

**Do not use the scanner immediately after moving it from a cold place into a warm room.**

Do not use the device immediately after moving it from a cold place into a warm room. Condensation may occur, which might lead to scanning errors. Let the device dry about one or two hours before you use it.

Safety Precautions(4)

**Before moving the scanner, disconnect the power plug from the power outlet.**

Do not move the scanner with the power and interface cables connected as this can damage the cables, which can later cause fire, electric shock as well as injury.

Before moving the scanner, be sure to disconnect the power plug from the power outlet, and all other data cables. Make sure that the floor is free of any obstructions.

**Protect the scanner from static electricity.**

Install the scanner away from strong magnetic fields and other sources of electronic noise. Also, protect the scanner against any static electricity, which can cause the scanner to malfunction.

**Do not use aerosol sprays near the scanner.**

Do not use aerosol sprays to clean the scanner. Aerosol sprays can blow dirt and dust inside the scanner, resulting in scanner failure or malfunction.

**Disconnect the power plug from the power outlet when the scanner is not used for a long period of time.**

When the scanner is not going to be used for a long period of time, be sure to disconnect the power plug from the power outlet.

**Do not install the scanner in direct sunlight.**

Do not install the scanner under direct sunlight or near heating apparatus. Doing so might cause excessive heat to build up inside the scanner, which can cause scanner trouble or even fire. Install the scanner in a well-ventilated location.

1.2 Functions of the operator panel

No.	Name	Function
1	Function No. display	Indicates the function No. and error status.
2	Function button	Changes the Function activated by the Send to button.
3	Send to button	Launches the linked application software.
4	Scan button	
5	Power button	Turns the scanner ON and OFF.
6	LED	Lights when the scanner is turned ON.

Indications on the Function Number display

Indication	Meaning
8	Blinks only one time upon turning on the scanner.
P	Indicates that the scanner has been turned ON and is being initialized.
0	Indicates that initialization will soon end.
1	Indicates that initialization has ended successfully. The scanner is now in "Ready Status".
U	Indicates that a temporary error occurred when documents were being scanned. A number appearing in alternation following the U (i.e. 1, 2 and 4) refers to the type of error. To return the scanner to the ready status ("1"), press "Scan" or "Send to" button.
E	Indicates that a device (hardware) alarm has occurred during scanning of documents. "E" and the alarm Number (2 to 9 and c) will appear alternately. To return the scanner to the ready status ("1"), press "Scan" or "Send to" button. If this alarm occurs, turn the power off and on again. If the alarm continues after turning the power on again, contact your service engineer.

2 BASIC SCANNER OPERATION

This chapter describes basic scanner operations.

In this chapter Windows XP screenshots are illustrated.

The screens and operations may differ slightly if the OS that you are using is other than Windows XP. Also, when FUJITSU TWAIN32 or FUJITSU ISIS is updated the screens and operations noted in this chapter will differ slightly.

CONTENTS**INTRODUCTION****1 NAMES AND FUNCTIONS OF PARTS****2 BASIC SCANNER OPERATIONS****2.1 Turning the scanner ON**

2.3 Scanning Documents

2.4 How to Use the Scanner Driver

3 SCANNING VARIOUS TYPES OF DOCUMENTS**4 DAILY CARE****5 REPLACING CONSUMABLES****6 TROUBLESHOOTING****7 DOCUMENT SPECIFICATIONS FOR ADF****8 OPTIONS****9 SCANNER SPECIFICATIONS****Appendix****2.1 Turning the scanner ON**

This section describes how to turn the scanner ON.

The following shows the procedure for turning the scanner ON.

1. Press the power button on the operator panel.

The scanner is turned ON, and the green LED on the operator panel lights.

Also, while the scanner is being initialized, the indication of the Function Number display changes as follows:
"8"->"P" -> "0" -> "1" The indication "1" means that the operator panel is in the ready status.

**HINT**

To turn the scanner OFF, hold the power button down for at least two seconds.

CONTENTS**INTRODUCTION****1 NAMES AND FUNCTIONS OF PARTS****2 BASIC SCANNER OPERATIONS****2.1 Turning the scanner ON**

2.2 Loading Documents on the ADF for Scanning

2.3 Scanning Documents

3 SCANNING VARIOUS TYPES OF DOCUMENTS**4 DAILY CARE****5 REPLACING CONSUMABLES****6 TROUBLESHOOTING****7 DOCUMENT SPECIFICATIONS FOR ADF****8 OPTIONS****9 SCANNER SPECIFICATIONS****Appendix****2.1 Turning the scanner ON(2)****■ Power Save Mode**

The Power Save mode keeps the scanner in a low-powered state after it has been turned ON. If no operation is performed on the scanner for 15 minutes, the scanner automatically switches to the Power Save mode.

In the Power Save mode, the indication of the Function Number display on the operator panel goes out, but the green LED stays lit. To return from the Power Save mode, perform one of the following:

1. Load the document on the ADF paper chute.
2. Press any button on the operator panel.
The scanner will be turned OFF when pressing down the power button for at least two seconds.
3. Execute a command from the scanner driver.

Confirm the following items before loading documents.**

- ① Confirm that all the documents have the same width.
- ② Check the number of sheets in the document stack.

The standard number of sheets that can be loaded on the scanner is as follows:

- A4-size paper or smaller that makes a document stack of 5mm or less
- Maximum 50 sheet at A4, 20 lb, or 80 g/m²

2. Fan the documents as follows:

- ① Lightly grip both ends of the document, then bend and fan it.
- ② Repeat this operation a couple of times.
- ③ Rotate the document 90 degrees, then bend and fan it again.
- ④ Align the edges of the documents.

HINT

The stacker prevents document sheets from dropping after they are scanned. Use the stacker as follows:

1. Lift up the stacker towards you by inserting your fingertips into the handle on the scanner.

2. Lift the paper stop and swing forward by inserting your fingertips into the indentations on the scanner as shown in below figure.

5. Start up the scanner application, and scan the document.

For details on how to scan documents using the ScandAll 21 application, refer to "[2.3 Scanning Documents](#)"

FUJITSU TWAIN32 Scanner Driver

FUJITSU TWAIN32 Scanner Driver is designed for scanning documents with FUJITSU image scanner fi series by using application software that complies with the TWAIN standard.

The following describes the procedure with examples of ScandAll 21 for ordinary scanning by using this driver software.

1. Procedure for Basic Scanning Operation

- ① Startup the application.

From the [Start] menu, select [Programs]-[Scanner Utility for Microsoft Window] and click [ScandAll 21].

- ② Select your scanner on the window below.

Select [Select Source] from the [Scan] menu.

- ③ Select [FUJITSU fi-5110Cdj] and then click the [Select] button.

- ④ Load the documents on the scanner.

For details on loading documents, refer to "[2.2 Loading Documents on the ADF for Scanning](#)".

- ⑤ Open the TWAIN Driver window.

Select [Scan To View] from the [Scan] menu.

HINT

ScandAll 21 provide scanning methods as follows:

- [To View...]: Displays scanned images on the window.
- [To File...]: Saves scanned images as files (*.BMP, *.TIF, *.JPG).
- [To FTP...]: Transfers scanned images to a FTP server.
- [To Adobe PDF...]: Saves scanned images as PDF files.
(*Adobe Acrobat must be installed beforehand.)
- [To Microsoft Share Point Portal Server...]: Transfers scanned images to Microsoft Share Point Portal Server.
- [To Mail...]: Launches mailer software and attaches scanned images to e-mail.

For details, refer to "ScandAll 21 Help".

⑥ Configure settings for scanning and click the [Scan] button.

For details about the settings on this window, refer to "[Setting Window for FUJITSU TWAIN32 Scanner Driver](#)".

→ The images of scanned documents are displayed on the [ScandAll 21] window.

Depending on the settings of the application software, images may not be displayed. For details, refer to the documentation or Help file of your application.

e.x.) When you select [To File...] from the [Scan] menu of ScandAll 21, images of scanned documents are not displayed on the window.

⑦ Save the scanned images.

Select [Save As...] from the [File] menu to save the scanned images.

If you wish to start another scanning, return to procedure 4.

⑧ End the application.

Select [Exit] from the [File] menu.

2.4 How to Use the Scanner Driver(5)

Resolution

Specifies the resolution of scanning.

It can be specified by selecting a default value from the list or customizing (specify any resolution in 1 dpi unit).

By marking the [Predefine] checkbox, you can select one from three predefined settings as [Normal], [Fine], [Super Fine] to scan documents instead of setting details by yourself.

Otherwise, you can change the details of the predefined settings on the [Resolution Setting] window, which appears when you click on the [...] button.

Scan Type

Specifies the feeding method, the side(s) to be scanned (Front Side, Back Side, Duplex) or details of Long page (the size of documents longer than A4).

Paper Size

Select the size of documents to be scanned from this list.

Windows for customizing the paper size will appear when you click on [...] besides the list. You can save any document size as a customized setting (up to three) or for changing the order of the paper size in the list.

Image Mode

Specifies the image type for the scanned documents.

Black & White	Documents are scanned in binary (black and white).
Halftone	Documents are scanned through halftone processing in black and white.
Grayscale	Documents are scanned in gradations from black to white. For this mode you can select 256 gradations or 4 bit (16 gradations).
Color	Documents are scanned in color. For this mode, you can select 24 bit Color, 256 Color or 8 Color.

[Scan] button

Starts scanning documents with the current settings.

CONTENTS**INTRODUCTION****1 NAMES AND FUNCTIONS OF PARTS****2 BASIC SCANNER OPERATIONS**

Documents are scanned preliminarily before the actual scanning. You can confirm the image of the documents in the preview window.

[Close] button

Saves the current settings and closes this window.

[Reset] button

Used to undo changes of settings.

[Help] button

Opens the "FUJITSU TWAIN32 Scanner Driver Help" window. The window also opens by pushing the [F1] key.

[About...] button

Opens an information window about the FUJITSU TWAIN32 Scanner Driver's version.

■ FUJITSU ISIS Scanner Driver

FUJITSU ISIS Scanner Driver is designed for scanning documents with FUJITSU image scanner fi series by using application software that complies with The ISIS standard.

The following describes the procedure with examples of QuickScan for ordinary scanning by using this driver software.

The procedure may vary depending on your application. If you use an application other than QuickScan, please refer to its Guide or Help for further information.

1. Procedure for Basic Scanning Operation

Startup the application.

- ① From the [Start] menu, select [Programs] - [QuickScan] and click [QuickScan].
- ② Select your scanner on the window below.

→ Select [Scan] - [Select Scanner] on the menu bar.

Select fi-5110C, then click the [OK] button.

③

Select [Scan] - [New Batch] on the menu bar.

④

2. Configuration Window of FUJITSU ISIS Scanner Driver

**■ Image Mode**

Select a color mode suitable for the purpose from the menu.

Black & White	Scans data in binary (black and white). Distinguishes black from white according to the fixed threshold. This scanning mode is suitable for scanning line drawings and text documents.
16-level Grayscale	Scans data by 14 shades of gray plus black and white. This mode uses 4 bits per pixel.
256-level Grayscale	Scans data by 256 shades of gray plus black and white. This mode uses 8 bits per pixel. This mode is suitable for scanning monochrome photographs.
24-bit Color	Scans data as full-colored image using 24 bits per pixel. This mode is suitable for scanning color photographs.
Image Processing	Binary processing is applied to the scanned images. This mode is available only when Image Processing Software Option (separately sold) is installed. Please refer to the "User's Guide of Image Processing Software Option" for details.

■ Resolution

Specifies the number of pixels (dots) per inch.

Select a fixed resolution from the list or enter any value (from 50 to 600) manually. A higher resolution produces finer image, but requires much more memory.

[◀](#) [10](#) | [11](#) | [12](#) | [13](#) | [14](#) | [15](#) | [16](#) [▶](#)

■ Halftone

Select the halftone pattern for halftone scanning. This setting is available when "Black & White" is selected in the "Image Mode".

Dither Pattern	This setting is suitable for scanning dark photographs.
Dither Pattern 1	This setting is suitable for scanning dark-colored documents containing both text and photographs.
Dither Pattern 2	This setting is suitable for scanning light photographs.
Dither Pattern 3	This setting is suitable for scanning light-colored documents containing both text and photographs.
Error Diffusion	This function minimizes differences of color levels due to subtractive color process by diffusing the difference to the adjacent pixels. This mode is suitable for scanning images of photographs, etc.
Download	Executes processing with the dithered download pattern specified in the dithered download file.

■ Brightness

Sets the brightness of the entire image. Specify the brightness as a number within the range of 1 (dark) to 255 (bright). To brighten the entire image, increase the value of the setting. To darken the entire image, decrease the value.

■ Contrast

Sets the contrast between light and shadow of the scanned image. Specify the contrast as a number within the range of 1 (low [soft]) to 255 (high [sharp]). Increasing this value makes the contrast sharper.

[More...] button

Opens [More Settings] window. Used for setting advanced features.

DTC Variance

This option specifies the value for adjusting the variance based on the brightness of the image.

Edge Processing

This option specifies the sharpness of contour extraction.

Low, Mid, High	Emphasizes contour of images. Available settings are: Low, Mid, High
Smoothing	Smoothes jaggy images.

Dropout Color

This option excludes selected color (the three primary colors of light i.e. green, red, blue) from scanned images. For example, if the document contains black text in a red frame and when the red color is selected, the scanner reads only the text and eliminate (drop out) the red frame.

If you do not wish to have any colors dropped out select "None".

Reverse

Colors of scanned images are reversed.

End of Page Detection

Scans the edge (bottom) of the documents and outputs data adjusted to the document length. When any page shorter than specified "Paper Size" is included, the output size is adjusted to the detected short size.

Gamma

Specifies Gamma correction. Correction patterns are: "Normal", "Soft", "Sharp", "Custom", or "Download".

Multi Feed Detection

Detects multi feeds (phenomena that two or more sheets are accidentally fed). You can set conditions for detecting multi feeds so that the scanner should stop and display error messages. Multi feeds are scanned by the differences in document lengths or thicknesses.

3.2 Scanning Different-width Documents

When you scan a batch of documents with different widths by using the ADF, you may get skewed images from smaller sized documents.

Be sure to scan only documents of the same width together.

The following shows the procedure for scanning a batch of mixed size documents.

1. Sort out the batch into stacks of the same width.
2. Adjust the side guides to the width of each document stack.
3. Scan the batches of the same widths separately one by one.

For details on how to load documents, see "[2.3 Scanning Documents](#)".

To save scanned images in PDF format, Adobe Acrobat 6.0 or later must be installed on your PC. Adobe Acrobat 6.0 can be installed from the provided Adobe Acrobat CD-ROM.

There are 2 ways for saving scanned images in PDF format.

1. Using ScandAll 21

This method is recommended for color or grayscale scanning and when smaller PDF file size is required.

The benefits are:

- Reduced PDF data size
- Simplified method for creating PDF files with no troublesome operations

2. Using Adobe Acrobat 6.0

This method is recommended for faster creation of PDF files and for black and white scanning.

The benefits are:

- Quick creation of PDF files with the original scan resolution
- Flexible creation of PDF files by changing the PDF compression rates

Grayscale or color scanning creates larger file sizes than black and white scanning. If the file size is very large, you can reduce the file size by configuring the properties of Acrobat Distiller before saving scanned images. For details, please refer to [the hints on page \(6\)](#).

Using Adobe Acrobat 6.0**ATTENTION****Usage note for Adobe Acrobat 6.0**

- Acrobat's default settings overrides the previous settings for "Resolution", "Scan Type" and "Image Mode".
- The following functions cannot be used:
 - "256 Color" or "8 Color"
 - "Rotation Degree" selection when "End of Page Detection" is selected
 - Long Page Scanning

1. Load the documents on the ADF paper chute.

2. Start up Adobe Acrobat 6.0.

Select [Program] - [Adobe Acrobat 6.0] from the [Start] menu. This starts up Adobe Acrobat 6.0.

3. From the [File] menu select [Create PDF] - [From Scanner].

→ [Create PDF From Scanner] dialog box appears.

4. Select [FUJITSU fi-5110Cdj] at [Device] and click [Scan] button.

→ [TWAIN driver] dialog box is displayed.

3.5 Excluding a Color in the Image (dropout color)

A selected color (primary colors: red, green or blue) can be removed (dropped out) from the scanned image data.

For example, if the document contains black text in a green frame, you can set the scanner to read only the text and eliminate (drop out) the green frame.

To set the scanner to drop out a color, change the settings in the [TWAIN Driver] dialog box before scanning.

1. Click the [Advance...] button in the [TWAIN Driver] dialog box.

→ The [Advance] dialog box appears.

2. Select the color to be drop out from "Dropout Color" under "More".

For example, if the document contains black text in green frame, select [Green] so that the scanner only reads the text and eliminates the frames.

If you do not wish to have any colors dropped out select "None".

3. Click the [OK] button.

The [TWAIN Driver] dialog box will be redisplayed.
Continue scanning from this dialog box.

4. With the slider control under [Blank Page Skip], specify the Blank Page Skip degree.

<In Binary/Halftone mode>

For white pages, use the [Black Dots Ratio] slider bar to set the skip condition. For black pages, use the [White Dots Ratio] scroll bar to set the skip condition.

The value displayed to the right of the scroll bar displays the noise ratio(*1). If a scanned document is below this value, it is recognized as a blank page. The setting range is OFF(-) and 0.2% to 3.0% (in increments of 0.2%).

*1: Ratio of black dots included in the scanning area. (for white pages)

<In Color/Grayscale mode>

Use the slider bar to set the skip condition in five stages from 1 to 5. To make the blank pages easy to skip, increase the value of the setting.

3. Select the detection conditions from "Multi Feed Detection" under "ADF Option".

The following detection conditions are provided:

None	Multi feed detection is not performed.
Check thickness	The scanner monitors the thickness of documents. It detects a multi feed by differences in document thickness when two or more document sheets are fed overlapping.
Check length	The scanner monitors the length of documents. It detects a multi feed by changes in the document length when two or more document sheets are fed overlapping.
Check thickness and length	The scanner monitors both document thickness and length to detect multi feed.

Furthermore, see "[7.5 Multi feed Detection Conditions](#)" for detailed information about the document for multi feed detection.

4. Click the [OK] button.

The display returns to the [TWAIN Driver] dialog box. Continue scanning from this dialog box.

Clean the scanner exterior, the ADF paper chute and the Stacker with a cloth moistened with a small amount of Cleaner F1 or any neutral detergent

**ATTENTION**

- Never use paint thinner and other organic solvents.
- During the cleaning, prevent water or moisture from getting inside the scanner.
- Do not use aerosol sprays to clean the scanner.
Aerosol sprays cause dirt and dust to enter the scanner, resulting in scanner failure and malfunction.

CONTENTS**INTRODUCTION****1 NAMES AND FUNCTIONS OF PARTS****2 BASIC SCANNER OPERATIONS****3 SCANNING VARIOUS TYPES OF DOCUMENTS****4 DAILY CARE**

4.2 Cleaning the Scanner Exterior

4.3 Cleaning the Inside of the Scanner**5 REPLACING CONSUMABLES****6 TROUBLESHOOTING****7 DOCUMENT SPECIFICATIONS FOR ADF****8 OPTIONS****9 SCANNER SPECIFICATIONS****Appendix****4.3 Cleaning the Inside of the Scanner**

Clean inside of the scanner with a cloth moistened with Cleaner F1.

In an alternating succession of scanning documents, the accumulated paper-powder and dust inside the scanner causes a scanning error.

As a guideline, clean the ADF every 1,000 scans. Note that this guideline varies according to the type of the documents you are scanning. For example, the ADF must be cleaned more frequently when scanning documents on that the toner has not been sufficiently fixed on.

Clean the ADF according to the following procedure referring to the illustrations on the following page.

**CAUTION**

The glass surface inside the ADF becomes hot during the scanner operation.

Before you start to clean the inside of the scanner, disconnect the AC adapter from the outlet and wait at least 15 minutes to let the scanner cool down.

**ATTENTION**

- Do not use water or neutral detergent to clean the inside of the scanner.
- Do not use aerosol sprays to clean the scanner.
Aerosol sprays cause dirt and dust to enter the scanner, resulting scanner failure and malfunction.

■ Turn off the scanner before cleaning the following locations.

- Pad ASSY (x 1)

Wipe the Pad ASSY (rubber surface) downwards. When cleaning the Pad ASSY, take care to prevent the cloth from catching on the metallic parts.

- ADF glass surfaces (x 2: located on the ADF and the opposite side)

Clean lightly.

If the glass is dirty, vertical black streaks may appear in the scanned images.

- Plastic rollers (x 4)

Clean them lightly while rotating the rollers with your finger. Take care not to roughen the surface of the rollers. Take particular care in cleaning the plastic rollers since black debris on the rollers adversely affect the pickup performance.

- Pick roller (x 1)

Lightly clean the Pick roller taking care not to scratch the roller surfaces and the Mylar sheet. Take particular care in cleaning this roller as black debris on it adversely affect the pickup performance.

Mylar sheet

With the movie below, review the procedure to clean the Pad ASSY, ADF glass surfaces, Plastic rollers and the Pick roller:

Turn on the scanner before cleaning the following locations.

- Feed rollers (x 4)

Clean lightly taking care not to roughen the surface of the rollers. Take particular care in cleaning the feed rollers since black debris on the rollers adversely affect the pickup performance.

1. Open the ADF when the indication of the Function Number display is not "P" or "0".

If you open the ADF when the indication of the Function Number display is "P" or "0", the Feed rollers will not rotate even you perform the operation of step 2) below.

2. Simultaneously hold down the "Send to" and "Scan" buttons on the operator panel. The Feed rollers start to rotate slowly.

For details on where the "Send to" and "Scan" buttons are located, refer to the following illustration.

3. Hold a soft, dry cloth moistened with cleaning fluid against the surface of the rotating Feed rollers so that it lightly cleans the surface of the rollers.

As a guideline, 6 presses of the "Send to" and "Scan" buttons make the Feed rollers to rotate one full turn.

CAUTION

In step 2, all the Feed rollers turn at the same time. When cleaning the Feed rollers positioned in the lower part of the ADF, be careful not to touch the other Feed rollers.

This chapter describes how to replace scanner consumables.

In this chapter Windows XP screenshots are illustrated.

The screens and operations may differ slightly if the OS that you are using is not Windows XP.

Also, when FUJITSU TWAIN32 or FUJITSU ISIS is updated the screens and operations noted in this chapter will differ slightly.

CAUTION

When operating the scanner, the ADF's inside glass becomes very hot.

Before you replace the consumables, turn off its power and unplug the AC adapter from the outlet. Wait for at least 15 minutes.

5.3 Replacing the Pick Roller

6 TROUBLESHOOTING**7 DOCUMENT SPECIFICATIONS FOR ADF****8 OPTIONS****9 SCANNER SPECIFICATIONS****Appendix****5.1 Consumable and Replacement Cycle**

The following table shows the specifications of consumables and their standard replacement cycle.

Description	Parts Number	Standard Replacement Cycle
PAD ASSY 	PA03360-0002	After 50,000 scans or one year.
Pick Roller 	PA03360-0001	100,000 scans or one year.

The replacement cycles above are rough guidelines for the case of using A4/Letter woodfree or wood containing paper 64 g/m² (17 lb). This cycle varies according to the type of the used paper and how frequently the scanner is used and cleaned.

**ATTENTION**

Use only the consumables specified by PFU LIMITED. Do not use consumables and parts made by other manufacturers.

To purchase the consumables, contact the FUJITSU scanner dealer where you purchased the scanner or an authorized FUJITSU scanner service provider.

■ Guidelines for Consumable Replacement Cycle

With this product, you can learn how many times the consumables are used so that you can estimate the right timing for the replacement.

1. When turning on the power, check that the scanner is connected to the PC.

Refer to "2.3 Connecting the USB cable" in fi-5110C Getting Started on the Setup CD-ROM for information about connecting the scanner to a personal computer.

2. Double click the "Printer and Other Hardware" icon on the operator panel of the host computer.

→ The [Printer and Other Hardware] screen is displayed.

3. In the [Printer and Other Hardware] screen, double click the "Scanners and Cameras" icon.

→ The [Scanners and Cameras] screen is displayed.

The following message may appear while you use the scanner:

Replace consumables when this message is displayed.

After clicking the [Ignore] button, this message will disappear and scanning will continue.

Please replace the consumable as soon as possible.

As a default, this message appears again after 100 scans. If you do not wish this message to display, click the [This message not display again].

To stop scanning and replace the consumable, click the [Cancel] button.

Replacement information is given in the following:

Pad ASSY: See "[5.2 Replacing the Pad ASSY](#)"

Pick Roller: See "[5.3 Replacing the Pick Roller](#)"

5.2 Replacing the Pad ASSY

1. Remove any documents on the ADF Paper Chute.
2. Open the ADF by pulling the ADF Open Lever.

CAUTION

Be careful, the ADF may close and pinch your finger.

3. Remove the Pad ASSY.

Press the knobs on both ends of the Pad ASSY, and pull the Pad ASSY upwards.

4. Attach the new Pad ASSY.

Hold both ends of the new Pad ASSY and attach it to its installation location. When doing this, take care not to catch the metallic parts of the Pad ASSY.

ATTENTION

Make sure that the Pad ASSY is firmly attached. When the Pad ASSY is not correctly attached, document jams or other feeding errors may occur.

5. Close the ADF.

You should hear the ADF click when it returns to its original position.

With the movie below, review the replacement procedure of the Pad ASSY:

1. Remove any documents on the ADF Paper Chute.

2. Remove the ADF paper chute.

3. Open the ADF by pulling the ADF Open Lever.

Caution

Be careful, the ADF may close and pinch your finger.

4. Remove the Sheet Guide.

Grip the knobs on the sheet guide with your fingers, and lift it up to remove.

5. Rotate the Pick Roller Bushing in the direction of the arrow.

6. Remove the Pick Roller with its shaft.

Hold the left part of the shaft, and raise it to remove the shaft from the scanner while pulling the shaft to the left.

Caution

The Pick roller Bushing is hard. Do not turn this bearing with your fingernails.

Use a paper clip for turning the roller bushing if you can not rotate it with your finger.

ATTENTION

If the area around the pick roller is dirty by paper-powder, it may cause a scanning error. Remove the dirt using a dry cloth with dollop of Cleaner F1.

* Do not use water, mild detergent or air-spray.

7. Remove the pick roller from its shaft.

Pull out the shaft from the pick roller while lifting up its tab.

Caution

If you push up the pick roller tab using your fingernail, it may hurt or get chipped your fingernail. If you worry about that, push up the pick roller tab using a paper clip.

8. Attach the new pick roller to the shaft.

Insert the new pick roller aligning the protrusion with the slot on the pick roller.

ATTENTION

Make sure that the Pick roller is completely attached. An incompletely attached Pick roller might cause document jams or other feedings errors.

9. Install the pick roller with its shaft to the scanner.

Attach the Pick roller to the scanner in reverse order of the procedure for removing.

10. Rotate the roller bushing by rotating it in the direction of the arrow.

ATTENTION

Make sure that the Pick roller is completely attached. An incompletely attached Pick roller might cause document jams or other feeding errors.

11. Attach the sheet guide to the scanner.

Pinch the knobs on the sheet guide and attach it to the scanner.

The sheet guide makes a clicking sound when the knobs fix into position.

Make sure that the sheet guide is completely attached. Otherwise, document jams or other feeding errors may occur.

12. Close the ADF.

You should hear the ADF click when it returns to its original position.

13. Attach the ADF paper chute.

With the movie below, review the replacement procedure of the Pick Roller.

If a document jam occurred, follow the procedure below to remove the jammed documents.

**CAUTION**

- Take care not to get injured when removing jammed documents.
- Be careful not to get neckties, necklaces, etc. entangled in the scanner when removing the jammed documents.
- The surface of the glass may become hot during operation. Take care not to get burned.

1. Remove any documents on the ADF paper chute.

2. Open the ADF by pulling the ADF Open Lever.

**CAUTION**

Be careful, the ADF may close and pinch your finger.

3. Remove the jammed document.

**ATTENTION**

- Staples, paper clips, etc. cause document jams. Be sure to fully check the document and feed path, and remove any small metal objects such as these. Also, before you start scanning, be sure to remove any staples, clips, etc. from the document.
- Take care not to pull the metallic parts of the Pad ASSY when removing jammed documents.

4. Close the ADF.

You should hear the ADF click when it returns to its original position.

**ATTENTION**

- Make sure that the ADF is completely closed. When it is not completely closed, document jams or feeding errors may occur.
- When the scanning is completed or canceled, the documents might remain inside the ADF even though any error message is not displayed. Follow the procedure below to remove the documents remaining in the ADF.
 1. Remove all documents from the ADF paper chute.
 2. Open the ADF by pulling the ADF open lever.
 3. Remove the remaining documents.
 4. Close the ADF.

With the movie below, review the procedure to remove jammed documents:

6.1 Removing Jammed Documents(2)

If a document jam or Multi Feed errors occur frequently, follow the procedures below.

1. Align the edges of the document sheets.

2. Hold both the left and right sides of the document with both hands, and, as shown below, bend the document, bring back and release one side of the stack.

3. The document edges will be slightly misaligned, as shown in the picture.

6.5 Checking Labels on the Scanner

7 DOCUMENT SPECIFICATIONS FOR ADF**8 OPTIONS****9 SCANNER SPECIFICATIONS****Appendix****6.2 Error Indications in the Operator Panel**

When any error occurs, the operator panel indicates "U" followed by a number for temporary errors or "E" followed by a number for device alarms (permanent error).

Temporary errors can be resolved by the operator, but the device alarm requires recovery works by support engineers.

When the Error Recovery Guide is installed on your PC, its window appears when Windows is started up. If any error or device alarm occurred, this software displays information such as error names and error codes regarding the error/alarm. Record the information and click [Details] on its window to learn detailed information for trouble shooting.

■ Temporary Errors :

A number appearing in alternation following the "U" refers to the following type of errors:

Indication	Meaning
U1	Paper Feed Error
U2	Multi Feed Error
U4	The ADF has been opened during scanning.

**HINT**

The Error Recover Guide is stored in Setup CD-ROM. When installing the application software, refer to "2.1 Installing the Scanner Application" in fi-5110C Getting Started.

■ Device alarms:

A number appearing in alternation following the "E" refers to the following type of device alarms:

Indication	Meaning
E2	Trouble in the optical system (front).
E3	Trouble in the optical system (back).
E4	The motor fuse has blown out.
E6	Trouble with the Operator Panel.
E7	Trouble occurred with the EEPROM.
E9	An error in the image memory.
Ec	An alarm in the memory.

When you encounter any alarm, turn off and on the scanner. If the alarm is still displayed on the Function No. display, contact the dealer where you purchased the scanner or an authorized FUJITSU scanner service provider.

Symptom 9 : Multi feed errors occur frequently.

[Back](#)

Do the documents satisfy the conditions described in "[7.2 Document Quality](#)"?

No

Use documents that satisfy the requirements.
For details on requirements, see "[7.2 Document Quality](#)".

When the multi feed detection is ON, are the multi feed detection conditions satisfied?
For details on multi feed, see "[7.5 Multi feed Detection Conditions](#)".

No

Satisfy the multi feed detection conditions.
For details on multi feed, see "[7.5 Multi feed Detection Conditions](#)".

Was the document fanned before loaded onto the ADF paper chute?

No

Fan the document before loading, or reduce the number of sheets of the document.

Have the documents just been printed out on a copier or laser printer?

Yes

Fan the documents 3 or 4 times to remove static electricity from the paper.

Is the document stack 5 mm or less?

No

Reduce the number of sheets of the document.

Are all the consumables (Pick roller and Pad ASSY) installed correctly?

No

Correctly install the consumables if needed.

Is any of consumables (Pick roller and Pad ASSY) dirty?

Yes

Clean the dirty consumables.
For details on how to clean the consumables, see "[4.3 Cleaning the Inside of the Scanner](#)".

Is any of consumables (Pick roller and Pad ASSY) worn out? (Check the consumable counter)

Yes

Replace the consumable, if needed. For details on how to replace and attach consumables, see "[5 REPLACING CONSUMABLES](#)".

If you cannot solve the problem after taking measures, check the items in "[6.4 Items to Check Before Contacting the Agent Where You Bought the Scanner](#)" and contact the dealer or an authorized FUJITSU service provider.

If you cannot solve the problem after checking the remedies in the Trouble shooting table, contact the dealer where you bought the scanner or an authorized FUJITSU scanner service provider. Before you ask for repair service, please collect the following information.

Check items:

1. Model: fi-5110C
2. Serial No.F (Example) 000001
For details on the serial No., refer to section "[6.4 Checking labels on the scanner](#)".
3. Production date : (Example) 2004-08 (August, 2004)
For details on the production date, refer to section "[6.4 Checking labels on the scanner](#)".

Please print out the Check List as below, it will be displayed on a new window when you click the link, and fill as much information as possible before contacting the agent.

▶ [The check list.](#)

Items to check before contacting the dealer where you bought the scanner

Check the following items before you contact the dealer where you bought the scanner.

■ General Details

Meaning	Findings
Model	fi-5110C
Serial No. (*)	(Example) 000001
Production date (*)	(Example) 2004-08 (August, 2004)
Date of purchase	,
Symptom	
Frequency of trouble	
Total Page Count(ADF) (**)	

*Please confirm the necessary information in the product label. (Refer to [6.5 Checking labels on the scanner](#))

**Please confirm the "Scanners and Cameras" dialogbox . (Refer to [5.1 Consumable and Replacement Cycle](#))

■ Installation or PC connection issues

Trouble of connection to your PC

Meaning	Findings
OS	
Displayed error message	(For support engineers, please record the error message and send images of captured screen.)
Interface	(Example) USB 1.1

Feed system trouble

Meaning	Findings
Document type	
Main purpose of use	
Last cleaning date	
Value of Consumable counter	(Example) Pick roller set counter XXX
Displayed sign or number on the Operator panel at trouble	

Imaging system trouble

Meaning	Findings
Type and version of scanner driver	
Type of interface controller	(Example) made by Adaptec SCSI Card 2940AU
OS (Windows)	
Application software	(Example) ScandAll 21, Acrobat

Others

Meaning	Findings
Can you send us both the original document and the scanned images by e-mail or Fax?

7 DOCUMENT SPECIFICATIONS FOR ADF

This chapter describes the required document size and paper quality for ensuring correct operation when scanning documents on the ADF.

CONTENTS**INTRODUCTION****1 NAMES AND FUNCTIONS OF PARTS****2 BASIC SCANNER OPERATIONS****3 SCANNING VARIOUS TYPES OF DOCUMENTS****4 DAILY CARE****5 REPLACING CONSUMABLES****6 TROUBLESHOOTING****7 DOCUMENT SPECIFICATIONS FOR ADF****7.1 Document Size**

7.2 Document Quality

7.3 Maximum Document Loading Capacity

7.4 Area not to be perforated

7.5 Multi feed Detection Conditions

8 OPTIONS**9 SCANNER SPECIFICATIONS****Appendix****7.1 Document Size**

The following shows the size of documents that can be scanned on the ADF.

Maximum		Minimum	
A	B	A	B
216 (8.5 in)	356 (14 in)	53 (2.1 in)	74 (2.9 in)

CONTENTS**INTRODUCTION****1 NAMES AND FUNCTIONS OF PARTS****2 BASIC SCANNER OPERATIONS****3 SCANNING VARIOUS TYPES OF DOCUMENTS****4 DAILY CARE****5 REPLACING CONSUMABLES****6 TROUBLESHOOTING****7 DOCUMENT SPECIFICATIONS FOR ADF**

7.1 Document Size

7.2 Document Quality

7.3 Maximum Document Loading Capacity

7.4 Area not to be perforated

7.5 Multi feed Detection Conditions

8 OPTIONS**9 SCANNER SPECIFICATIONS****Appendix****7.2 Document Quality****Document Type**

The following paper types are recommended for document use:

- Woodfree paper
- Wood containing paper

When using documents of paper type other than the above, check whether or not the document can be scanned by test-scanning a few sheets before executing the actual document.

Document Thickness

Paper thickness is expressed by "paper weight." The following shows the paper weights that can be used on this scanner:

- 52 g/m² to 127 g/m²

Only paper weight of 127 g/m² is acceptable for A8-size documents.

Precautions

The following documents may not be scanned successfully:

- Documents of non-uniform thickness (e.g. envelopes)
- Wrinkled or curled documents (See [HINT on next page](#))
- Folded or torn documents
- Tracing paper
- Coated paper
- Carbon paper
- Carbonless paper
- Photosensitive paper
- Perforated or punched documents
- Documents that are not square or rectangular
- Very thin documents

Do not use the following documents:

- Paper-clipped or stapled documents
- Documents on which the ink is still wet
- Documents smaller than A8 (Portrait) in size
- Documents wider than A4 or Letter size (216mm)
- Documents other than paper such as fabric, metal foil, or transparencies

7.2 Document Quality(2)

◀ 1 | 2 ▶

HINT

- When scanning semi-transparent documents, slide the [Brightness] bar to "light" to avoid bleed through.
- To prevent the rollers from becoming dirty, avoid scanning documents containing large areas written or filled in pencil. If scanning of such documents is unavoidable, clean the rollers frequently.

ATTENTION

- Carbonless paper contains chemical substances that may damage the Pad ASSY or rollers (e.g. Pick roller) when documents are fed. Pay attention to the following:

Cleaning:

If pick errors occur frequently, clean the Pad ASSY and Pick rollers. For details on cleaning the Pad ASSY and Pick rollers, see "[4.3 Cleaning the Inside of the Scanner](#)".

Replacing parts:

The service life of the Pad ASSY and Pick rollers is sometimes shortened when scanning medium-grade paper documents.

- When the manuscript of Wood containing paper is read, the life of a Pad ASSY and a Pick roller may become short compared with the case where the manuscript of Woodfree paper is read.

HINT

When using the ADF, the leading edge of all document sheets must be evenly aligned. Make sure that curling at the leading edge is within the following tolerances:

7.2 Document Quality

7.3 Maximum Document Loading Capacity

7.4 Area not to be perforated

7.5 Multi feed Detection Conditions**8 OPTIONS****9 SCANNER SPECIFICATIONS****Appendix****7.5 Multi feed Detection Conditions**

There are three multi feed detection modes: document thickness, document length, and both document thickness and length. The following conditions must be satisfied in each of these detection modes.

Detection by Document Thickness

Sheets of the same thickness shall be set in the ADF at a time.

- Document thickness: 0.065 to 0.15mm
- Printed area: 12% or less
- No black printed areas are allowed at the center area (26 x 10mm) at the leading edge of the document.
- Punched holes are not allowed within 35mm of the vertical center line of the document.
- The deviation in the amount of the light transmitted through background areas must not be less than 10%.

Detection by Document Length

Sheets of the same length shall be set in the ADF at a time.

- Document length deviation: 1% or less
- Punched holes are not allowed within 35mm of the vertical center line of the document.

Detection by Document Thickness and Length

Sheets of the same thickness and length shall be set in the ADF at a time.

- Document thickness: 0.065 to 0.15mm
- Document length deviation: 1% or less
- Printed area: 12% or less
- No black printed areas are allowed at the center area (26 x 10mm) at the leading edge of the document.
- Punched holes are not allowed within 35mm of the vertical center line of the document.
- The deviation in the amount of the light transmitted through background areas must not be less than 10%.
